

# FITNESS SCALE

Accurate , Strong , Safe , Reliable

Ultrasonic Height Sensor, Measures from 100 cm to 200 cm (3'4" to 6'8"), with 1 cm ( 1/2" ) accuracy. It works on the same system used by bats to navigate when flying.

BMI (Body Mass Index) computer calculates BMI with decimal accuracy. BMI is a well known system that allows the evaluation of people's obesity based on height and weight.

Red bright digits indicate weight in 100g steps (4 Oz). It is possible to have either Kg of Lb as default values Weight can be displayed in alternative system at the push of a button.

A Coin acceptor with cash box can be added to operate the scale with a coin or a token.

Power supply is fixed on a separate box on the back of the scale and can be removed and put into a higher position on the wall, if the scale is to be operated in a humid place.

**FTS (Fitness Scale)** is a professional innovative scale designed after 15 years of experience in manufacturing people weighing scales. It is designed to be a strong and reliable machine for heavy duty usage.

The basic version is the FTS-A to which a Height Meter and/or Coin acceptor can be added to make the following versions:

**FTS-C:** Fitness scale with coin or token acceptor

**FTS-H:** Fitness scale with height meter

**FTS-HC:** Fitness scale with coin acceptor and height meter

All models share the same specs:

**Weighing Range:**

500 g to 180 Kg in 100 g steps  
1 Lb to 396 Lb in 4 Oz steps.

**Bright LED displays** for an optimum visibility under any light condition.

**Extremely reliable** and easy to calibrate and maintain

FTS-A is the basic model in which the Fitness scale is supplied

Dimensions in cm : 33(W)x50(D)x92(H) \*H=235 for FTS-H - weight 31 Kg (68Lb)  
Dimensions in ft&In 1'1"(W)x1'8"(D)x3'1"(H) \*H=7'8" for FTS-H - weight 33Kg (72Lb)  
Power: 110-230 VAC 50/60Hz 20 VA
